

Clinton County Radio System Project

CLIENT SPECIFICATIONS AND NEEDS:

FCC rules and regulations required Clinton County, Pennsylvania and their public safety field users to migrate their current radio system to narrow band frequency. The timing was tight and so was the budget.

MCM SOLUTIONS:

MCM Consulting Group, Inc, (MCM) began by providing fundamental and comprehensive planning. MCM conducted a needs assessment survey to determine the most needed improvements. Then a physical site survey and equipment inventory were completed. MCM then created a plan to migrate the county's radio system to narrow band and built an 8-site, repeated, simulcast communications system.

RESULTS:

MCM completed the project on time and on budget. Clinton County now has a state-of-the-art radio system that significantly improves radio capacity and coverage for the county's PSAP, Police, Fire, EMA and EMS.
